

## INFORMATION FOR DEVELOPERS

### Test Transaction Processing Information

SecurePay has configured a unique account for ongoing implementation and testing:

#### Test Payment Account:

Merchant ID	ABC0001
Transaction Password	abc123

#### Test Merchant Login:

URL	<a href="http://www.securepay.com.au/developer_resources.html">http://www.securepay.com.au/developer_resources.html</a>
Merchant ID	ABC
Username	test
Password	abc1234!!

#### Test Payment URL's (and ports):

Java/XML/COM Non-SSL	<a href="http://test.securepay.com.au/xmlapi/payment">http://test.securepay.com.au/xmlapi/payment</a> (port 80)
Java/XML/COM SSL	<a href="https://www.securepay.com.au/test/payment">https://www.securepay.com.au/test/payment</a> (port 443)

Use Visa card number 4444333322221111, and a valid expiry date (E.g. 10/10) to initiate test payments.

The amount processed when testing dictates the transaction response:

<b>Approved</b>	Amounts ending with 00, 08 (and 77 for ANZ). For example, \$1.00. \$12.08 are approved.
<b>Declined</b>	Amounts ending in all other two digit combinations will be declined with the matching bank codes (01-07, 09-76, 78-99).
